

## Planners Comments

I hope everyone enjoyed the challenging but hopefully fair and fun courses at Ogden. I had hoped to give all courses a good navigational challenge no matter what the age class and based on feedback I think I achieved this. Some courses were described to me after people had finished as a "long middle" which was true. To avoid boring path routes and make the most of the better parts of the area, many routes were planned to run perpendicular to the paths and keep people in the terrain with lots of changes of direction. I hope everyone can forgive me for the net uphill courses but can agree the views from the finish across the area you had all just ran through were beautiful and the good weather today played a massive part in that too. The eagle eyed among you would have noticed the new addition to the map next to the golf course which many courses had loop of controls around. This was a great little addition and added something new for those of you who have visited Ogden many times before. I hope you all had a fantastic day out and if you spot me at any events in the future always feel free to offer your feedback from the event. I love hearing from everyone.

Connor.
