Event Format:

The event is a 60 minute score event using an enlarged extract of the OS Explorer Map at a scale of 1:10,000.(tbc). The location of the checkpoints will marked on your map. You must register in the pub, where you will be issued with your map.

You will need to download the MapRun app.
App link: maprunners.weebly.com

Or go to the apple or android app store and search Maprun

There are 42 checkpoints– you visit as many as you can within the 60 minutes Each checkpoint you find scores you 20 points. There is a 10 point penalty for each minute or part minute that you are late back. You may take part as a solo entrant pair, small, group or family. Any under 16s must be accompanied by a responsible adult.

There will be no checkpoint markers at the control sites. There is a description sheet on the map. All checkpoints will be on very obvious features, like path junctions, or bridges.

MapRun will be used for start and finish timing, recording visits to checkpoints and results production.

In order to feature in the results you will need to use the MapRun app on your Smartphone.

If you don't get a beep at a checkpoint AND you know you are in the right place, then just continue on your run and tell the admin team in the pub after you finish.

If it is clear from your track that you should be credited with the points for the missing beep checkpoint(s) then you will be!

A compass may be useful (but not mandatory) and a watch to ensure you stay within the time limit. (You won't need a dibber, or any other device to record your progress)
